

Academics

Whether you're a high school student exploring college options, transferring from another institution, interested in graduate programs or returning to college as a working adult, you've come to the right place for more information about what we have to offer. Welcome!

The College of Science and Technology at Central Michigan University provides outstanding opportunities for learning about science, mathematics, engineering and technology. An exceptional faculty will help you learn by teaching the classes that you take and by inviting you to participate in field trips, research projects and other unique educational experiences.

Major programs in science and technology fields will prepare you for a career or for further study in graduate and professional programs by providing the skills, knowledge, and perspectives you need to succeed in today's rapidly changing world.

Learning beyond the classroom

[◀ Back to top](#)

The College of Science and Technology provides many resources and opportunities for educational experiences beyond the classroom.

▶ **Field and laboratory experiences** are woven throughout the curricula. Geology, geography, biology, and environmental science courses are enriched by field work. Laboratory components in chemistry, physics, computer science, engineering, and mathematics classes enable students to acquire knowledge through hands-on experience.

▶ **Research opportunities** encourage undergraduate students to develop a passion for discovery and invention. Exploring new territory stimulates intellectual growth and provides valuable career experience. Students have the opportunity to present their research findings.

▶ **Internships** help students make connections between the classroom and careers. Many opportunities exist for science and technology students to participate in internships closely related to their professional interests. Some programs, such as environmental studies and information technology, require internships.

▶ **The Science and Technology Residential College** makes its home in Woldt Residence Hall with classrooms and lab buildings located nearby. The purpose of the residential college is to provide an on-campus learning environment that fosters the academic success of students pursuing studies in science, technology, engineering and mathematics.

Undergraduate scholarships and financial awards

[◀ Back to top](#)

Central Michigan University is committed to making a college education affordable and to helping students who need financial assistance. For many CMU students, scholarships provide an important part of their financial aid package.

Each CST department offers a number of scholarships including both merit- and need-based financial awards for incoming freshmen, transfer students, and continuing students.

The university also offers a variety of scholarship opportunities for undergraduate students, including Centralis Scholarships and Board of Trustees Scholarships.

**Please note: The above list is not a comprehensive list of all available scholarships. Contact the Office of Scholarships and Financial Aid for additional scholarships available to science and technology students.*

Graduate and international admissions and support

[◀ Back to top](#)

Applications for admission are available through the [College of Graduate Studies](#). Departments with graduate programs offer teaching and research assistantships. Each assistantship provides a stipend and a tuition scholarship. Information about graduate assistantships is available from CST departments.
