Online

[◀ Back to top](#)

CMU takes online learning to the next level by delivering a broad range of courses from the convenience of your own home. Our online classes are available anywhere, any time.

Online classes provide a convenient alternative for people with busy schedules or those unable to attend on-campus programs.

Off-Campus

[◀ Back to top](#)

CMU offers programs in more than 60 locations nationwide and internationally, delivering our brand of exceptional programs to a location near you, wherever you are!

All off-campus programs are held to the same high standards. The over 5,000 new students admitted to CMU's Off-Campus Programs each year receive the same quality education as our on-campus students.

Bachelor of Science, Major in Information Technology

The Information Technology major fills the gap between computer scientists and general users of computer information systems. You'll learn a systematic approach to designing information technology solutions that go beyond the scope of general users. The degree prepares you for a career as a database administrator, application system designer, computer network director, Web specialist, intranet/firewall administrator, computer service technologist, computer security technologist, and more.
