124 hours minimum required for graduation. 40 hours of courses at the 300 level or above required.

Students may choose to take classes during the summer as well.

BIO electives should be taken in consultation with an advisor.

*This map outlines the coursework that a Plan A or B PG/PF pre-dental student may undertake if choosing a minor in chemistry.

If the student chooses to forego the chemistry minor for another, the student could replace CHM 211 with a course toward another minor (and would likely need to take additional courses toward that minor). If the student chose the Plan A option, CHM 211 could be replaced with whatever degree requirements the student needed to fill.

****If STA 382 is taken instead of BIO 500, three additional BIO credits are required.**

CHM 425, or the equivalent, is required by many dental schools.
